Automation Solutions

Available to Your Business

Solutions Overview

1

FAQ Bots

Company specific data sources

2

Contract Review Agent

Bespoke Policy driven AI review

3

Contract Generator

Power Automate (no AI)

4

Contract Summariser

AI powered summaries

5

RFP / Contract Comparison

Historic dataset matching

6

Governance Workflows

Approval & sign off flows

7

Legal Search Agents

Bounded trusted web search

8

Document Comparison

Enhancing Draftable functionality

9

Legal Ops Platforms

Matter mgmt. platforms

1 | FAQ Bots

Utilising Company Specific Data Sources

- AI powered bot restricted to your specific data sets
- Answers company specific queries accurately
- Configurable subject matter: compliance, legal, HR, general company info
- Access control: specific users, internal only, or external facing
- Deployable on: website, Teams, or Slack

2 | Contract Review Agent

Bespoke AI Powered Review Against Company Specific Policies

Policy Driven Review

Reviews contracts against your bespoke trading policies. Separate rule sets for supplier vs. customer contracts.

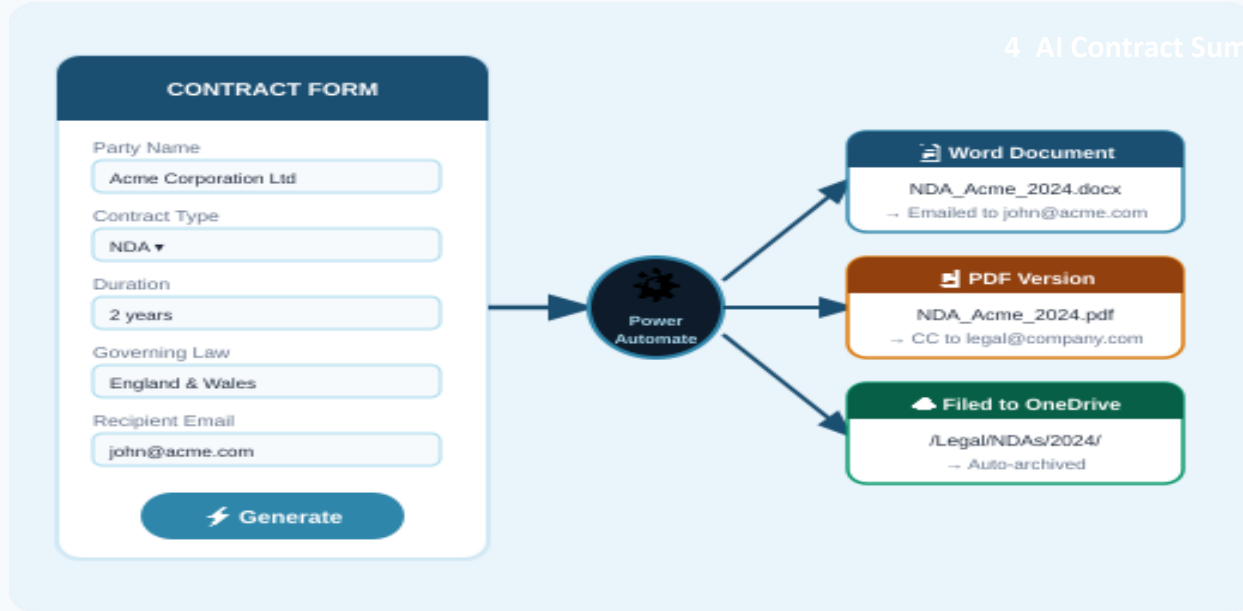

Structured Reports

Outputs fully controlled reports prioritising key issues for your business eg: liability caps, parent company guarantees, payment terms.

Access & Deployment

Restrict to specific users or teams. Deploy on website, Teams, or Slack. Internal use only recommended.

3 | Contract Generator

4 AI Contract Summariser

Standard Contract Generator (Power Automate — no AI required)

Tool deployable on: Website • Microsoft Teams • Slack • Output: Email / Word / PDF / OneDrive

4 | Contract Summariser

AI Contract Summariser

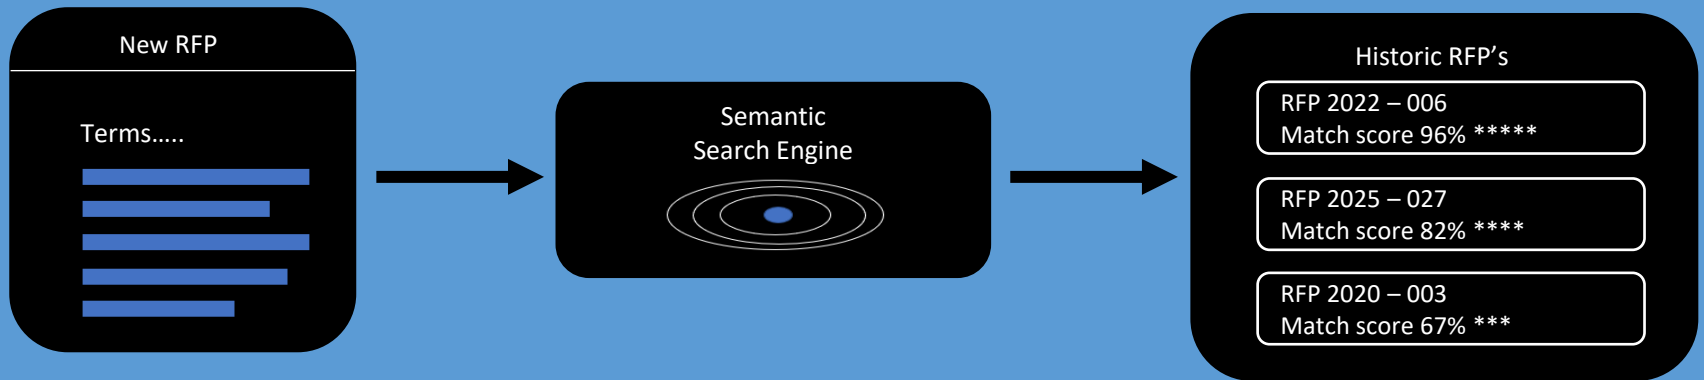

Bespoke AI driven contract summariser

- AI produces detailed summaries based on company templates
- Ordered output: eg parties, payment terms, liability, key dates
- Different templates for customer vs. supplier contracts
- Consistent format — always highlights priority issues
- Output as email, Word document, or PDF
- Access restricted to specified users / teams

3 Standard Contract Generator (Per Automate — no AI required)

Tool deployable on: Website • Microsoft Teams • Slack • Output: Email / Word / PDF / OneDrive

5 | RFP / Contract Comparison Agent

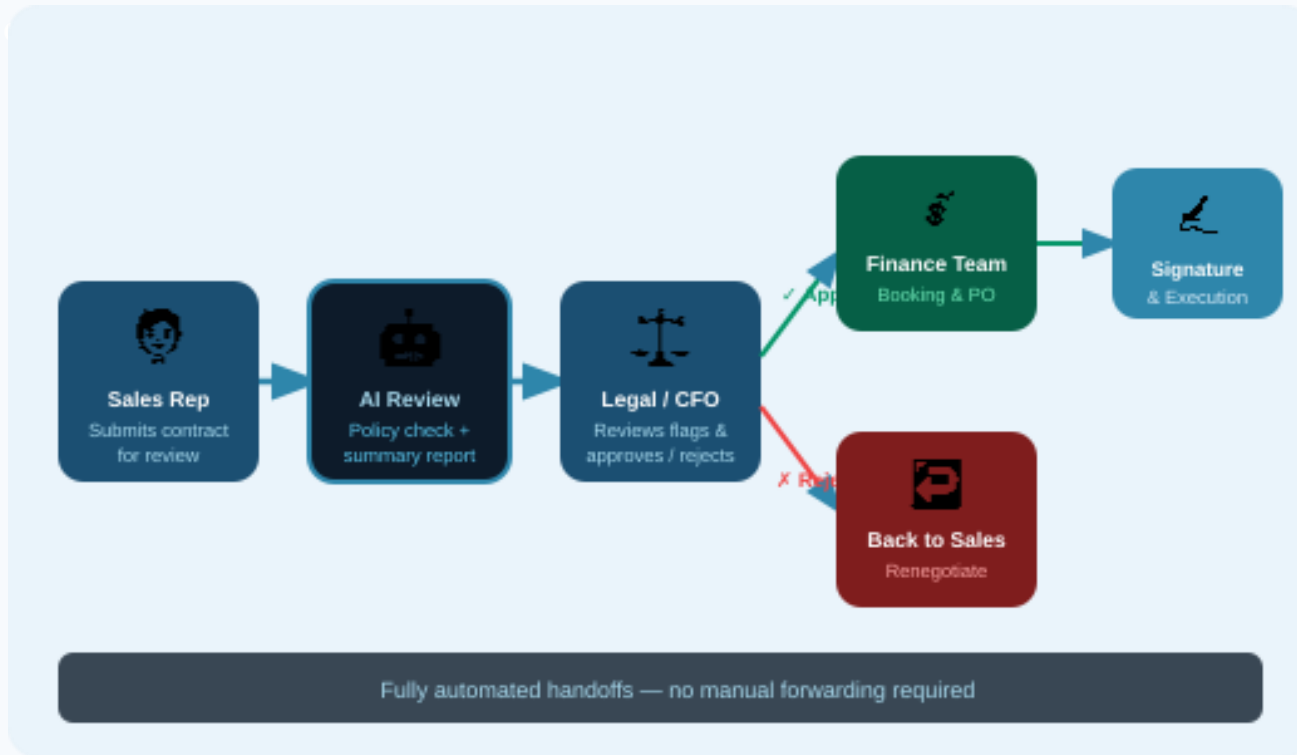

Use AI to identify and compare historic RFP responses/ agreements to new RFP's or agreements. Output link to document, similarity score, and negotiation recommendations.

Key Benefits:

Consistent responses • Faster RFP completion • Multiple historic matches surfaced
Semantic similarity - exact match not required

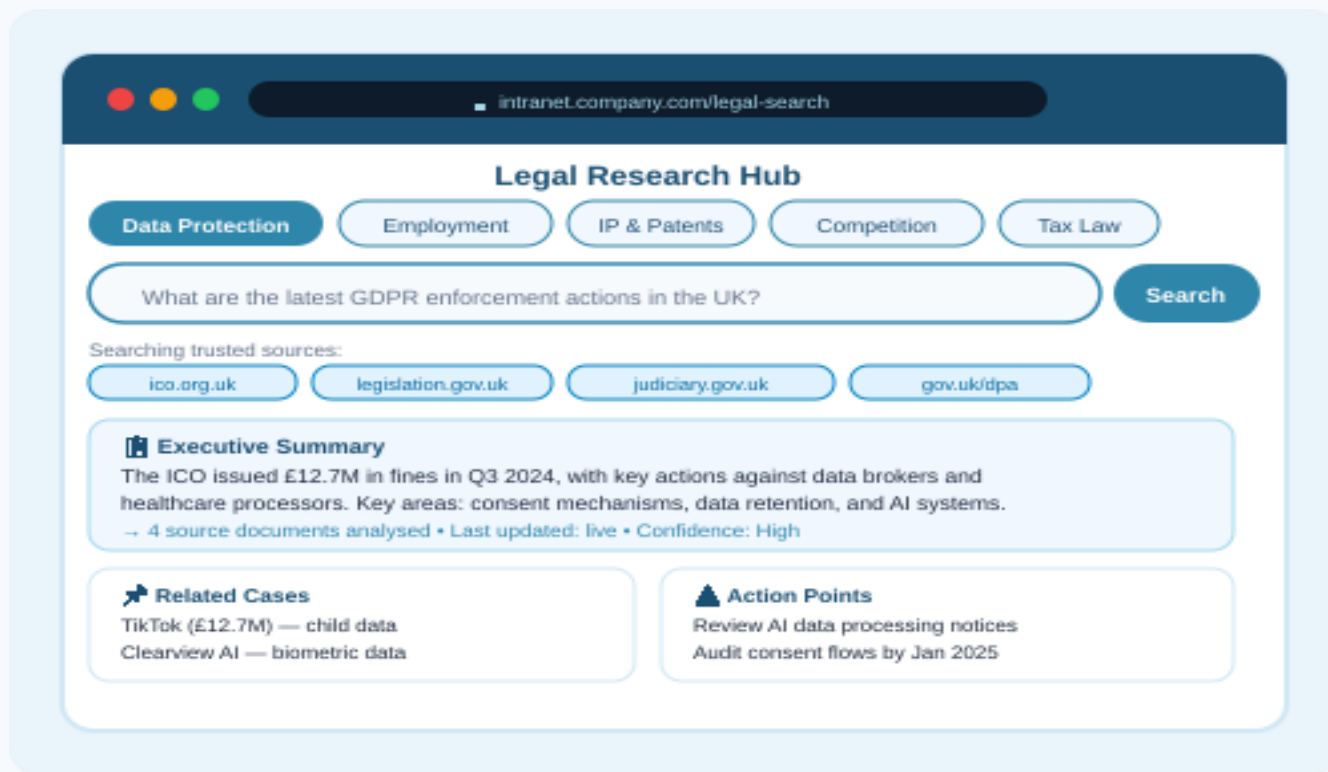

6 | Governance Workflows

6

* Sign-off protocols via AI or Power Automate * Automated forwarding on approval * Full audit trail maintained

7 | Bespoke Legal Search Agents

* Searches specified trusted sites only * multiple specialist agents * bespoke business format executive summaries

8 | Document Comparison

Contract Comparison (Draftable Desktop)

Side-by-Side Document Comparison

The screenshot displays a side-by-side comparison of two document versions. The left pane is titled 'ORIGINAL VERSION' and the right pane is titled 'REVISED VERSION'. A central vertical bar labeled 'CHANGES' contains two colored buttons: a red one above a green one. In the original version, the text 'Liability cap: 1x annual contract value' and 'Payment terms: 30 days net' are highlighted in red. In the revised version, the text 'Liability cap: 2x annual contract value' and 'Payment terms: 60 days net' are highlighted in green. At the bottom, a legend shows a red square for 'Deleted' and a green square for 'Added'. A status bar at the bottom right indicates '2 changes detected' and 'AI negotiation tactics available'.

ORIGINAL VERSION

REVISED VERSION

CHANGES

Deleted Added

2 changes detected — AI negotiation tactics available

- Recommended: Draftable Desktop — compares Word, PDF, Excel
- Output options: side-by-side, track changes, pivot table
- Can compare negotiation emails to track amendments
- Can be combined with AI bot to recommend negotiation tactics

Legal Operations Platform Integration

Custom workflows · Auto-create documents · Business self-service

Matter, Email & Document Mgmt

Fast advanced search · Strong collaboration tools

External Counsel Management

Manage outside counsel relationships and spend

Reporting & Metrics

Track KPIs · Performance dashboards · Data-driven decisions

Flexible AI Model Integration

Every AI-powered solution supports configurable model selection:

Claude Sonnet
by Anthropic

★ PREFERRED MODEL

- ✔ Strong privacy policy
- ✔ No training on your data
- ✔ Enterprise security
- ✔ Constitutional AI
- ✔ UK/EU data options

ChatGPT
by OpenAI

ENTERPRISE OPTION

- ✔ Wide enterprise adoption
- ✔ Strong capabilities
- ✔ API available
- ⚠ Data use — check terms
- ✔ Well-documented

Other Models
Configurable

FLEXIBLE CHOICE

- ✔ Gemini (Google)
- ✔ Llama (Meta / local)
- ✔ Azure OpenAI
- ✔ On-premises options
- ✔ Open source models

Model can be switched at any time – decisions driven by your business and privacy requirements

Ready to Transform Your Legal Operations?

A central graphic featuring a dark blue circle with the letters 'AI' inside, surrounded by three wavy lines. This circle is part of a larger network diagram consisting of a hexagonal grid of nodes connected by thin lines, with several nodes highlighted in a lighter blue color.

- All solutions can be scoped and tailored to your business needs
- AI model selection aligned to your data privacy requirements
- Modular — deploy one solution or build an integrated suite
- Accessible via web, Microsoft Teams, or Slack

Let's discuss which solutions are right for you.
